

Plate Oligos...

Plate Oligos from TAG Copenhagen are delivered to universities, hospitals and pharma/biotech across Europe at low cost. Buy high throughput plate oligos and pay as Research projects that can use plate oligos can pay as little as 0,13 €/base.

All our plate oligos go through a double OD measurement QC as any other oligo that we manufacture. In addition, our plate oligos go through a batchwise selected quality control by MALDI-TOF MassSpec. Plate oligos that do not meet required quality standards, are re-synthesized as a guarantee, so our customer can rely 100% on their products.

DNA Reverse Phase Column Plate Oligos

- Deprotected & desalted
- Recommended for methods like PCR, sequencing and hybridization
- Synthesis scale: 0,04 µmol
- Delivery form: Solid
- Delivered in a 96-well microliter plate
- Minimum order: 48 oligos
- Oligo length: 15-60 bases
- Oligos should be similar in length and composition
- Modification allowed
- Certificate of Analysis (CoA) follows
- Double OD measurement
- 100% Quality Controlled (QC) by MassSpec
- To be kept frozen at -18 C
- The plate oligo price depends on your volume

Delivered in well plate format (96); 40 nmol Desalted

# bases/oligo	# of DNA Oligos	Production time (days)	Price per base (in DKK)	Price per base (in €)
15-60	48 - 96	1	1,40	0,19
15-60	97 - 192	1-2	1,35	0,18
15-60	193 - 288	1-3	1,28	0,17
15-60	289 - 384	1-3	1,20	0,16
15-60	385 - 480	2-4	1,13	0,15
15-60	481 - 576	2-4	1,05	0,14
15-60	577 - 672	2-4	0,98	0,13

High quality plate oligos

We manufacture in compliance with DIN EN ISO 9001:2008. Our plate oligos is a comprehensive flexible service adapted to any customer's need. Plate oligos are manufactured in a top modern state-of-the-art DNA synthesis lab. Our employees have a long track record in the production of oligos with special attention on traceability, maintenance and calibration programs, supplier evaluation, lot release and QC.

How to order:

Please contact our customer service when ordering plate oligos.
